Preferred Location: Gurgaon (Open to relocation)

PROFESSIONAL SUMMARY

Python developer with 10 years of experience building backend systems, automating CI/CD pipelines, and delivering site-reliability tooling across finance, telecom, and enterprise environments. Skilled in Django, Kubernetes, and observability tooling (Prometheus/Grafana), with hands-on experience scaling infrastructure automation to enterprise-wide deployments spanning 80,000+ machines. Currently supporting Morgan Stanley's Enterprise Security Platform team on packet-capture and security tooling infrastructure, and actively expanding into GenAI/LLM tooling through applied projects and certification study.

CORE SKILLS

- Languages & Frameworks: Python, Django, Django REST Framework, Flask, Scapy, Shell Scripting
- Infrastructure & DevOps: Docker, Kubernetes, Helm, OpenShift, Jenkins, GitLab CI/CD
- Cloud & Systems: AWS, OpenStack, Linux/Unix (RHEL, CentOS, Ubuntu, AIX), Windows
- Observability & SRE: Prometheus, Grafana, Pushgateway, Alertmanager, HP SiteScope
- Databases: MySQL, PostgreSQL, Snowflake
- Testing & Automation: Pytest, Selenium, Playwright, Locust
- Tools: Git / GitHub / GitLab, JIRA, BMC Remedy, QuickBuild

PROFESSIONAL EXPERIENCE

Lead Associate Engineer — Euclid Innovations (Client: Morgan Stanley) *Feb 2022 – Present*

- Deliver security infrastructure tooling for Morgan Stanley's Enterprise Security Platform (ESP) team, supporting packet-capture operations across 80,000+ machines via the Netwatch project.
- Built Netwatch, a Python application using the Scapy library to capture and analyze source and destination details of network requests across the server fleet, forming the core packet-capture engine used in ESP's security infrastructure.
- Lead rollout of the Aquilion feature across the full Morgan Stanley machine fleet, ensuring consistent behavior across a large, heterogeneous production environment.
- Migrated services to OpenShift using Helm, standardizing deployment across environments.
- Built SRE monitoring and alerting workflows using Prometheus, Pushgateway, and Alertmanager to improve visibility into service health.
- Designed and executed performance test suites for GET/POST APIs using Locust to validate system behavior under load.
- Built a complete UI test automation suite from scratch using Playwright and MCP server integration within one month, covering core functionality across the entire web application.

Senior Software Engineer — Capgemini (Client: Nokia) *May 2020 – Feb 2022*

- Owned and maintained 5+ legacy network-element simulators (Python, Java, Flask, PostgreSQL, MySQL) used for log collection, credential retrieval, and trap generation.
- Designed and built new simulators including Cyber-Ark (Python, Flask, GitLab token-based authentication) and an SNMP Simulator (net-snmp, PySNMP, MIB-based trap generation).
- Automated the full simulator build and deployment pipeline using GitLab CI/CD, Docker, and Kubernetes, cutting manual deployment effort.
- Deployed Kubernetes pods to support performance and load-testing environments.

SDET — HashedIN (Client: Nutanix) *Jan 2020 – May 2020*

- Wrote and maintained automated test scripts using Pytest and Selenium for Nutanix's in-house testing application.

Web Developer — Tata Consultancy Services (Client: Cisco Systems) *Jul 2018 – Dec 2019*

- Built a web application from the ground up using Python, Django, Django REST Framework, and MySQL.

- Implemented new features and resolved production bugs on an existing Django-based project while concurrently supporting a second active project.

Engineer – Software — SLK Software Services

Oct 2015 – Oct 2017

- Automated environment-specific configuration updates using Python and shell scripting, removing manual steps from deployment processes.
- Led annual Disaster Recovery implementation and management for production systems.

EDUCATION

B.E., Electrical and Electronics Engineering — Sri Venkateshwara College of Engineering, Bangalore — 2015

CERTIFICATIONS

- ITIL V3 Foundation Certification
- In Progress: GenAI Essentials Certification (ExamPro) — expected Q4 2026
